ATS

REPAIRABLE PARTS MANAGEMENT

REDUCE PART COSTS AND IMPROVE RELIABILITY

Our Repairable Parts Management (RPM) program is designed to solve the challenges Procurement and Reliability manufacturing leaders face.

The program is managed by ATS through an on-site lead responsible for the end-to-end process execution that focuses on improving part reliability and reducing overall part costs. We also track and report on all repairs you outsource – not just the ones ATS performs. KPIs include cost savings, reliability improvements, warranty capture, and core return rates.

WE PROVIDE PROVEN VALUE THROUGH:

- Competitive repair pricing
- Management of all repairs, tracking, warranties and histories
- Root cause focus on repetitive failures
- Parts consumption reduction due to improved reliability
- Strategic sourcing of obsolete assets
- Comprehensive monthly report
- Supporting sustainability initiatives

OUR QUALITY REPAIR PROCESS INCLUDES:

- Comprehensive cleaning and inspection prior to repair
- Identification and replacement of defective components
- Proactively perform preventative maintenance
- Full functional testing – your part is returned, ready to run
- Detailed service report to help you identify repetitive failures
- Standard 7-10 day lead time or rush option, same day – 48 hours
- 1-year in service warranty from installation date; 5-year shelf warranty

PARTS REPAIR EXPERTISE

- INDUSTRIAL CONTROLS
- ELECTRONICS
- POSITION CONTROLS
- PLANT AUTOMATION
- MECHANICAL
- POWER TRAIN/ MOTION
- ELECTRO-MECHANICAL
