Factory Maintenance in Food Processing: Achieve Greater Reliability

Advanced Technology Services (ATS) has the people, processes and technology to ensure that critical processing, packaging and inspection run efficiently within plant operations. We reduce maintenance costs, increase operational efficiency and accelerate reliability improvements for our customers by utilizing a range of high-tech solutions for production equipment and IT assets. From SQF, GMP and sanitation requirements to the importance of lines running at high rates of speed, ATS gets it. Our solutions are proven in the Consumer Packaged Goods (CPG) industry, providing our customers peace of mind and improved bottom line.

Best-In-Class Maintenance and Industrial Parts Services

CPG manufacturing professionals know that the complex and sometimes highly-specialized machinery found in CPG plants requires solid maintenance support to perform as required. Components fail and can be hard to find. Even when a source is found, spare parts for rare machines can carry a hefty cost, along with lead times that can be crippling. This, in addition to the existing costs incurred by downtime from an unproductive machine. No matter the size of the company, the potential for savings – both on replacing broken components and limiting their negative impact – exists, and ATS provides it.

Services to Keep Machines Running – And Running Better

Reliability is key to CPG manufacturing and ATS has been equipping manufacturers to implement reliability excellence programs for more than three decades. In that time, ATS' analytic capabilities have grown alongside the industry. When it comes to component failure, ATS knows the warning signs. Our expertise and experience has enabled the company to implement reliability excellence programs at a proven rate of three times that of the industry standard.

ATS implements predictive maintenance technologies to help customers prevent equipment failures. By using cutting edge analytical methods, we are able to evaluate components' proximity to failure, allowing manufacturers to be proactive in replacing parts in order to avoid catastrophic breakdowns and extended production downtime.

And while ATS is running the numbers on components, it's not just our employees who are learning. ATS provides a range of technical training services and subject matter experts to help train and educate manufacturing professionals in keeping with the guidelines of the American Productivity and Quality Center.

Localized Experts and Inventory to Meet Global Needs

In a global economy, manufacturers might end up paying a premium to get the critical component needed for a piece of machinery and the specialized knowledge it takes to make the repair. ATS' inventory network allows CPG clients to get what is needed as quickly as possible. With 18 different maintenance and reliability solutions, rapid response services available and a presence at more than 120 customer plants in the U.S., U.K. and Mexico, ATS' CPG customers always have a proven source to turn to.

Heightened Performance, Greater Efficiency, Proven Savings

There is a chain of manufacturing efficiency that starts with properly functioning machine components and ends with high-quality CPG products. If components break down, delivery, quality and the cost to produce all suffer. By ensuring that CPG machines and all of their components operate at the highest-level possible, ATS helps achieve greater reliability with proven savings.

Powered by ATS. Driven by Reliability.

We help manufacturers stay competitive by getting improved output from their production assets. Our team of skilled maintenance technicians and MRO specialists work on-site at your facility for as long as you need us, to ensure your equipment runs at peak performance.

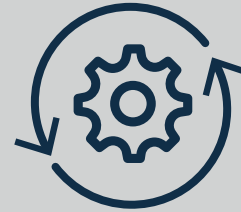

FACTORY MAINTENANCE

Through our turnkey, on-site approach to maintenance, ATS can optimize your production equipment, dramatically lowering your manufacturing costs and establishing standardized metrics for measurable results.

Our Value-Driven Solution Includes:

- Plant Safety
- Standards & Best Practices
- Skilled Workforce
- Smart Technologies
- MRO Asset Management
- Reliability-Centered Maintenance
- Factory Maintenance Services

MRO ASSET MANAGEMENT

Our on-site MRO Asset Management Solution is designed to positively impact the performance of not just your storeroom, but also your manufacturing equipment, your production output - and ultimately your bottom line.

Our Value-Driven Solution Includes:

- Storeroom Management
- Inventory Management
- Repairable Parts Management
- Supply Chain and Procurement

Awards & Recognition

- Top 10 Military Friendly Employer, GI Jobs, 2019
- Best Employers for New Graduates, Forbes, 2018
- Companies to Watch, UK, 2018
- Engineering Leaders Under 40, Control Engineering, 2016-2017
- ATS' MRO Asset Management Solution, Product of the Year Finalist, Plant Engineering, 2016
- N.A. Factory Maintenance & Industrial Services Customer Value Leadership Award, Frost & Sullivan, 2015
- Supplier Excellence Award, Eaton, 2015
- Chairman's Award for Operational Excellence, Caterpillar, 2015
- Fastest Growing Private Companies in America, Inc. Magazine, 2007, 2008, 2011 & 2013
