ATS

LUBRICATION MANAGEMENT

MACHINERY LUBRICATION FOR SMOOTH OPERATION

Increase Uptime by Reducing Wear and Tear

Machines subjected to extreme operating conditions and harsh environments impose an extraordinary burden on their components. Premature wear of critical components can lead to unexpected failure of the equipment and even entire production lines. A robust, proactive lubrication and fluids management program is essential to curtail asset and lube degradation and optimize machine reliability and longevity.

Lubrication Programs Improve Reliability and Performance

ATS offers turnkey lubrication services as a standalone program and as part of our comprehensive maintenance program. Putting ATS in charge of your lubrication management can dramatically shorten the program's startup time, improve traditional lube schedules, and deliver continuing efficiencies that boost the bottom line and maximize ROI.

Following an assessment of the current state, our highly trained MLT1/MLT2-certified professionals will establish a state-of-the-art lubrication management infrastructure, including storage and filtration systems, contamination control accessories, automatic lubricating systems, visual identification and monitoring tools, and web-based oil analysis for proactive monitoring of lube health and deviations requiring attention.

Additionally, they will consolidate and optimize the lubricants used and create efficient lubrication task routes and PMs. The program is administered from this foundation, ensuring superior cost and performance efficiencies, increased uptime and overall equipment effectiveness, and reduced environmental and safety risks.

ON-SITE PROGRAM INCLUDES:

LUBRICATION STORAGE

LUBRICATION IDENTIFICATION

ROUTE MAPPING

CLEAN OIL DELIVERY

CONTINUOUS IMPROVEMENT

Proper lubrication management, fundamental to reliability excellence, helps to ensure your critical components are well-maintained, your assets are healthy and operational, and your business performance objectives are met. A lubrication program from ATS removes the burden of implementation and management off your hands while providing the benefit of improved uptime.

ATS Lubrication Management Program

MLT1/MLT2 Certified Professionals

Lubrication Reliability Assessment

Lube Consolidation And Optimization

Visual Identification Tools

Clean Storage And Filtration Systems

Web-Based Oil Analysis

Automatic Lubricating Systems

Modern Lube Accessories

Optimized Lube Routes

Continuous Improvement
