Predictive Maintenance to Eliminate Unplanned Downtime

All-Inclusive Machine Health Monitoring System
Simple to Deploy, Adopt, and Scale

How It Works

24/7 Monitoring
Sensors collect machine data

Real-Time Alerts
Analyzed by condition monitoring experts

Prescriptive Actions
On-site maintenance team addresses the issue

Measurable Results
Eliminates unplanned downtime and reduces cost

Where Technology Meets Reliability

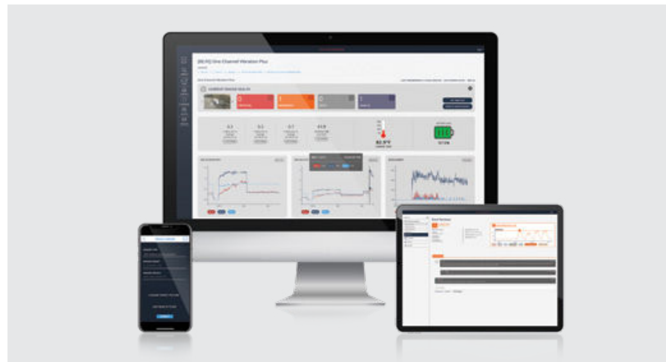
- Professionally installed by ATS with no machine downtime
- Cloud-based software that can be leveraged and accessed at every level of your enterprise
- Equipment expertise and data insights that are applied across machines and plants
- Meets all national and international accreditations and compliance for enterprise scalability
- Options to integrate with your CMMS or data warehouse

Replace Instinct with Insights

Simply put, we make factories run better and smarter. Leveraging more than three decades of hands-on maintenance and reliability experience with the latest predictive maintenance and machine health monitoring technologies, ATS delivers prescriptive actions to eliminate unplanned downtime and reduce maintenance costs.

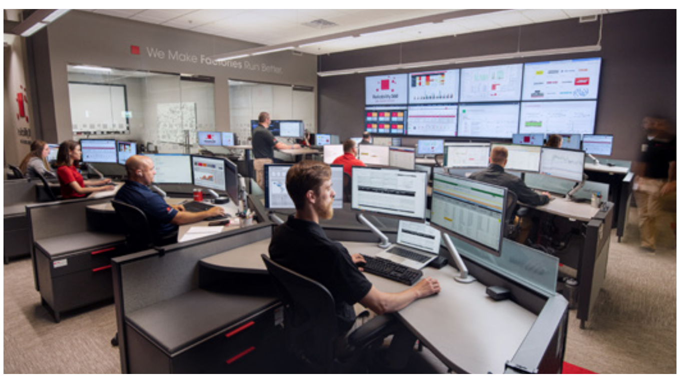
Quick Installation with No Downtime

Our predictive maintenance platforms (vibration, ultrasonics, oil analysis) are industrially designed and built for your environment, with minimally invasive installation.



Data at Your Fingertips

Utilize the full suite of analysis tools and dashboards, all within one platform for predictive analytics across your facility and enterprise.



Centralized Condition Monitoring

Our team of reliability experts analyze the data, interpret the findings and provide prescriptive actions to the on-site maintenance team to eliminate machine failures before they occur.

Measurable Results

Implementation of a predictive maintenance program creates significant return on investment. Our machine health monitoring platform provides an average 8x ROI in the first year.
