

# A 5-STEP GLIMPSE

into the  
Part Repair Process  
at ATS

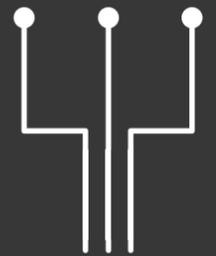

## STEP 1

Equipment is inspected, barcoded, and logged into tracking system.

## STEP 2

Parts and components are disassembled (if submitted as an equipment package) and washed.

## STEP 3

Parts are repaired or replaced, each placed through rigorous testing and analysis.

## STEP 4

Equipment is reassembled with fixed/replaced parts and undergoes final testing in anticipated real-world conditions.

## STEP 5

Parts are shipped with a failure report and recommendations for extending the life of components.

1,000+

OEM brands serviced

60,000+

part SKUs repaired
