

BUILDING PRODUCTS

WE KEEP PRODUCTION MOVING

The United States represents the world's largest market for building products, so industry manufacturers need their equipment operating at peak performance to meet tight production schedules and full performance targets. In most plants, performance is measured on equipment utilization and overall equipment effectiveness (OEE). If a factory's maintenance program doesn't meet its requirements, reliability and plant performance suffer. According to analyst firm Aberdeen Research, estimated downtime and scrap can cost a manufacturer thousands of dollars per hour.

In highly electronic and mechanical environments found in building products, the downtime of a failed machine can significantly impact delivery, quality and cost of production. To combat this, factories need a maintenance program executed by skilled technicians to ensure reliability and plant performance stay at peak efficiency.

Solving the widespread industry challenge of finding top-tier technical talent in manufacturing has also never been more difficult. A high degree of strategic planning and expertise in the area of industrial maintenance performance is required when looking to successfully recruit, train and retain a highly skilled technical workforce.

We understand that executing reliability programs to increase uptime and lower costs can be challenging. As a leader for over three decades in industrial maintenance services for many building products manufacturers, ATS has the specialized expertise to reduce maintenance costs, increase operational efficiency, and accelerate reliability. We excel at delivering measurable and sustainable results for key performance metrics. It's at our core and we're ready to put it to work for you.

RELIABILITY IS A CHALLENGE. WE CAN HELP.

ATS offers a variety of solutions to meet your unique needs, from comprehensive maintenance to more tailored programs that provide skilled technicians to supplement and support your maintenance and reliability goals.

Our proven value comes from the combination of our technically skilled workforce, established processes and data-driven technologies to help manufacturers meet their business objectives.

THE BEST TALENT

In today's competitive job market, we are a leading employer through our unique talent acquisition strategy that utilizes the latest tools, technologies and analytics to attract and hire the best people for your production environment. For our highly skilled technicians on staff, we provide market leading salaries, robust benefits and additional incentives that are unparalleled in the industry.

A COMPETITIVE EDGE

ATS continually invests in the development of our technicians' expertise through a lab-based curriculum and the latest technologies in electronic and mechanical skill sets, plus advanced training in CNC, PLC, and robotics. Technicians also receive customized training to ensure they meet the needs of each customer's specific environment.

WORLD-CLASS SAFETY

At ATS, safety goes beyond our industry-leading OSHA incident rate and regulatory compliance. Our Beyond Zero safety culture prioritizes best-in-class safety procedures and programs with overall employee well-being.

SMART TECHNOLOGIES

Our Reliability 360™ technology-based approach to maintenance drives asset health and productivity through a combination of sensors, remote monitoring and predictive analytics for measurable uptime improvements and reduced costs.
