## How Technology is Changing the Face of Manufacturing

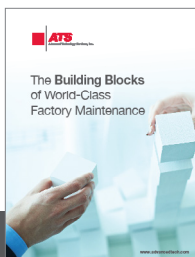

In the last 25 years, most manufacturers have implemented new technology in some form with the overall goal of boosting output and increasing revenues. Now manufacturing is undergoing the next wave, termed the Industrial Internet of Things (IIoT).

*Learn from industry experts what new technologies you should be investing in and how communication is key. Jeremy Wright, Director of Product Management at Advanced Technology Services provides input on how reliability engineers play an important role in the success of IIoT and data sharing.*
