

HEAT TREAT SERVICES

# IMPROVE RELIABILITY TO MAXIMIZE PROFITABILITY

## Lack of Maintenance Sends Profits Up in Smoke

Burner replacements, burner repairs, and refractory brickwork are a fact of life in heat treat services. Worn and damaged brickwork raises energy usage, reduces efficiency, and puts your operations at risk of major downtime events when not proactively monitored and addressed. Cool down and warm up times for ovens can make scheduling preventive maintenance difficult to coordinate. Our expertise can help you adapt to the challenges while maintaining the utmost attention to safety, quality and regulatory compliance.

## What We Do

The ATS team works with you to decide which heat-treat maintenance service you need to ensure your factory runs better and your machines operate efficiently. We provide a comprehensive preventive maintenance program based on predictive analytics and actual burn time for each piece of heat treat equipment you have.

We partner with your production team to schedule the heat treat maintenance services you need at the right time to prolong your equipment's life without disrupting critical production. We ensure that the necessary parts, tools, equipment and planning are in place to maximize our repair efficiencies and minimize your downtime.

## SPECIALIZED SERVICES

HARDENING/  
CARBURIZING/  
VACUUM FURNACES

TEMPER/DRAW  
FURNACES

INDUCTION  
FURNACES

ENDOTHERMIC  
GAS GENERATORS

QUENCH VALVES  
& MACHINES

SHOT BLAST  
MACHINES

CONVEYORS

Advanced Technology Services offers specialized heat treat services for the maintenance and repair of your equipment. Our team helps you keep your assets running smoothly to eliminate bottlenecks and unexpected delays.
