

LIVE SAFETY CULTURE LOOKS BEYOND ZERO

At Advanced Technology Services, Inc. (ATS), safety goes beyond our industry-leading OSHA incident rate and regulatory compliance – it’s about total well-being. We believe that employee well-being is just as important as following essential safety procedures in the workplace. That is why we strive for excellence with a Beyond Zero safety culture.

Safety excellence is embedded throughout the entire organization. Operations, support personnel, sales and marketing, finance, executive leadership, and others at every level are fully engaged in the safety process.

Our long-standing “Zero Incident” objective has helped us to achieve world-class safety performance. However, as we approached zero incidents, we realized that our focus would need to go beyond workplace safety incidents. Our Beyond Zero philosophy includes five areas of focus (as shown in graphic on right) and provides education, tools and resources which help support a happier, healthier and focused workforce.

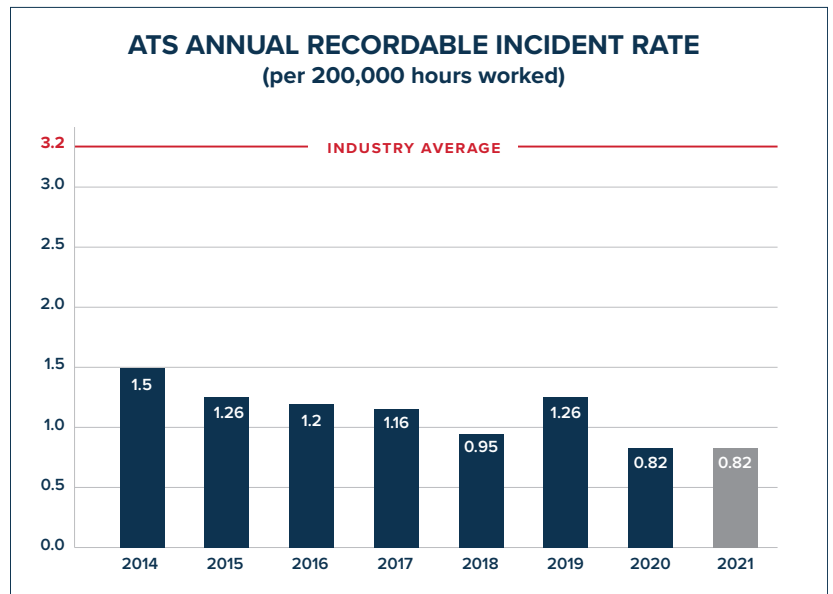

The Beyond Zero framework motivates our employees to continually improve their personal well-being, both in and out of the workplace. In addition to excelling at work-related safety best practices, we want them also to feel good, work confidently, and return home safely to their families each day.

For our customers, Beyond Zero provides the peace of mind that we have the established standards and processes to continuously deliver safety excellence. Process and discrete manufacturers entrust ATS to provide safe and effective machinery maintenance services and MRO asset management as our Live Safety / Beyond Zero culture helps to minimize their risk and downtime.

Over three decades of experience providing industrial maintenance services have fed the development and continual refinement of our safety processes, systems, and culture.

- Our Safety Management Process, Plan for Zero, and Live Safety culture facilitate continuous improvement and keeps us focused on the path to zero incidents.
- Our comprehensive Safety Dashboard helps us to monitor leading indicators that influence lagging indicators and integrate safety performance with other strategic business objectives.
- Our Live Safety / Beyond Zero safety culture is a promise to our people that their well-being is essential to everyone's success, including yours.

“

I would recommend ATS to any manufacturer that doesn't have a good, structured maintenance program. Their commitment to employee and workplace safety is aligned to ours through a well-defined scope.
