

ATS Technical Workforce Solution

30% IMPROVEMENT IN WEEKLY OEE IN FIRST 6 MONTHS

Manufacturer Challenges

A rural manufacturer contacted ATS describing challenges related to their technician shortage, maintenance strategy and critical asset performance.

Unplanned Downtime

Technicians were constantly addressing down machines and aging legacy equipment.

Recruiting Technical Talent

Manufacturer was experiencing recruitment challenges and technical talent shortages.

Workforce Retention

The plant was struggling with retention issues partly due to the remote location.

ATS Solution

To help with these challenges, ATS brought in five skilled technicians and one supervisor to improve operational efficiencies and bring reliability expertise to the manufacturer's overall maintenance program.

“

Having my technicians paired with ATS technicians raised their skill levels and helped them learn more through on-the-job training.

— Plant Manager

”

BOTTOM-LINE SUCCESS

Within just six months, ATS improved weekly OEE by 30% and successfully delivered two times as many completed work orders than previously achieved per day.
