

ATS Machine Health Monitoring Provides CPG Enterprise \$2M in Cost Savings

MANUFACTURER CHALLENGES

1

Inadequate systems

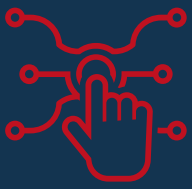

2

Equipment failures

3

Costly downtime

THE ATS SOLUTION

During a trial period of different technology providers, the ATS Machine Health Monitoring Solution quickly outperformed the competition and was then deployed at multiple plants globally.

ATS installed sensors on multiple critical assets which enabled real-time machine data via cloud-based dashboards to be actively monitored and analyzed by condition monitoring experts in the ATS Reliability 360[®] Technology Center.

MEASURABLE RESULTS

In less than a year, over 2,000 sensors were installed on 1,200 critical assets. The implementation of machine health monitoring resulted in the following successes:

50

Downtime risks avoided

\$2M

Cost savings

150%

Return on investment

“

We use the sensors not only to catch assets before failure, but also to adjust our maintenance plans.
