

30-DAY SENSOR TRIAL SAVES CPG MANUFACTURER \$86,000

Customer Challenges

1

Implementing predictive maintenance

2

Eliminating unplanned downtime

3

Monitoring critical machine assets

Monitoring Solution

To help overcome productivity challenges the consumer goods manufacturer partnered with Advanced Technology Services for a 30-day risk-free trial of our Machine Health Monitoring System.

The tailored solution produced:

132

Sensors installed on 43 critical assets

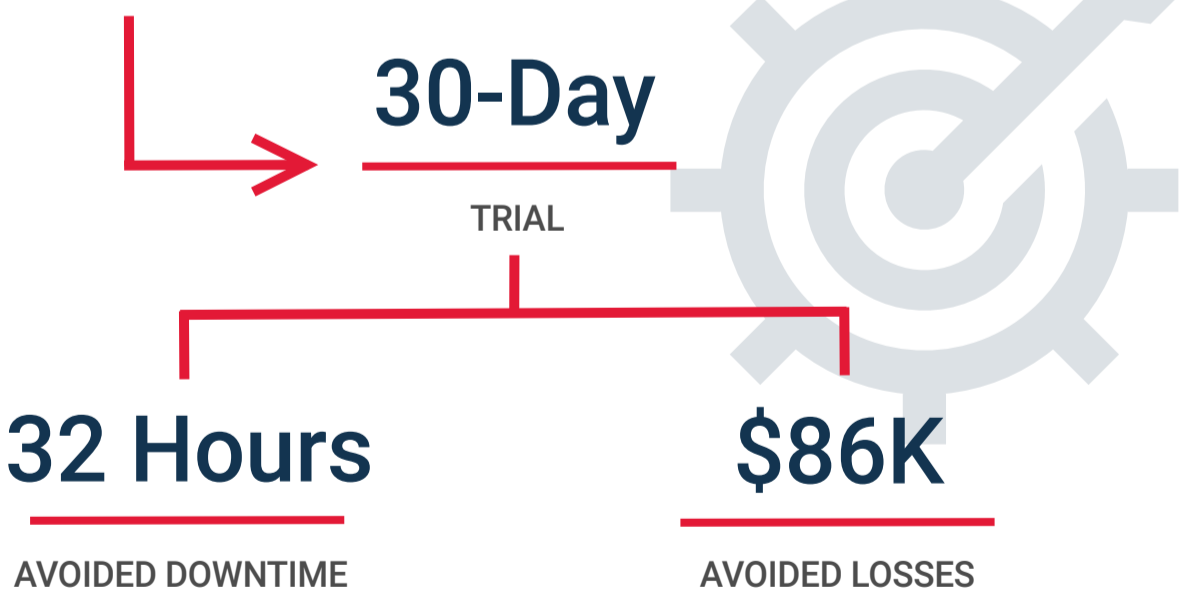

46,720

Vibration and temperature data points analyzed

4

Alerts triggered with detailed maintenance recommendations

Measurable Results

"I can't say enough good things about ATS. I'm in daily communications with their reliability team and they answer all my questions and provide suggestions that improve my operational efficiency."
