

First 90 Days of R360™ Machine Health Monitoring Delivers 32x ROI

LARGEST BAKERY COMPANY IN THE U.S.

CPG Manufacturer Challenges

Shortage of Skilled Technicians

Completing PM's & PdM Implementation

Reducing Unplanned Downtime

ATS Labor & Technology Solutions

Supplemental Maintenance

ATS initially supported this leading manufacturer with 2 technicians for 6 months at 1 plant to help with their short-term labor needs.

Machine Health Monitoring

The manufacturer was seeking a more predictive maintenance approach beyond just the hardware/software and technician diagnostics.

ATS was chosen as their strategic partner to accomplish this through their Reliability 360® Machine Health Monitoring program that is driven by decades of proven maintenance, reliability, equipment and technician expertise.

Partnership Growth

Corporate reliability team and plant leadership are exploring ways to grow their ATS partnership.

Expand machine health monitoring across multiple plants and then enterprise wide.

What's Next

As part of plant reliability excellence, they are exploring storeroom management with ATS.
