

LEADERSHIP PROGRAM

Being a Leader in Industrial Maintenance

Advanced Technology Services (ATS) has a deep-rooted history of hiring and supporting our nation’s military. This drove us to seek out involvement in DOD SkillBridge Programs for Leadership, setting those who are transitioning out of military service up for success. We understand the value you bring to the table as a leader in the military and it is our goal to provide you with the greatest opportunity possible to utilize those skills in a new civilian career. When you join us for your SkillBridge program, you will get just a small taste of what ATS has to offer you outside of the Armed Services.

At ATS, we are, and have always been, a people company. A core pillar of our culture is Value Employees, and you’ll see that in action every day. Our employees experience competitive pay and benefits, as well as opportunities for continuous career growth. At ATS, you drive your future! Whether it’s progressing through our Technician Development Program or completing a Leadership Development Program, the opportunities for a fulfilling career are endless. With around 20% of veterans in our ranks, you’ll feel right at home, and be in the company of others who strive for the best!

We are so excited to have you join the ATS Team for SkillBridge and beyond!
