Turning Bottlenecks into Bottling Success: Wine Manufacturer Boosts Production Availability from 33% to 68%

Manufacturer's Profile

Plant Improvement Opportunities

Safety Compliancy Completing PM Tasks & Compliancy

ATS Solution

Rapid Surge Support

Rapid surge support services deployed eight multi-craft technicians to address serious maintenance challenges and spare parts issues at their Napa Valley, CA plant, leading to improved asset performance and enabling higher production availability.

Success Within the First 60 Days

Improved Safety & LOTO Procedures

LOTO (Lockout-Tagout) procedures isolate energy sources during maintenance, ensuring worker safety around hazardous machinery.

Enhanced Cross-Functional Collaboration

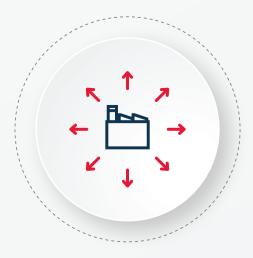

This approach optimizes maintenance, reducing downtime, enhancing productivity, and leading to cost savings and successful projects.

Increased Production Availability from

33% to 68%

High production availability improves output, on-time deliveries, and cost-efficiency which supports a company's competitiveness and profitability.

Partnership Growth What's Next

Expansion plans for

ATS Comprehensive Maintenance
