

CONSUMER PACKAGED GOODS

WE DELIVER RELIABILITY EXCELLENCE

The relentless demand for consumable products leaves consumer packaged goods (CPG) manufacturers no margin for compromise. Quality, safety, and throughput are top priorities, as they drive customer trust and brand loyalty for the short life-cycle products in this highly competitive sector.

Unlike durable goods, CPG products are routinely replenished, including foods, beverages, toiletries, over-the-counter medicine, paper products, and other household goods. Production, packaging, and inspection occur at high speeds using complex, specialized equipment. Sustainable uptime, availability, and production agility are necessary to meet aggressive mass production or personalization objectives.

Maintenance and reliability optimization are key to maximizing efficiency and performance, yet skilled-labor shortages and supply chain weaknesses may challenge a CPG plant's best efforts. Deep equipment expertise and the ability to predict impending failures are crucial to preventing the high costs and risks of unplanned downtime. A finely tuned inventory network helps to control replacement part costs and lead times, and to avoid fines or penalties for missed delivery windows.

CPG manufacturers also need to stay abreast of the latest health, safety, and environmental regulations, such as Good Manufacturing Practices (GMP) or Safe Quality Food (SQF) Code. Whether for brick-and-mortar stores or online sales, the products must always be effective and safe for use.

ATS helps industries such as CPG manufacturing with technology-driven industrial maintenance and parts services while ensuring safety, high quality, and regulatory compliance. With decades of maintenance and reliability experience, ATS provides manufacturers increased uptime, improved asset reliability, and reduced manufacturing costs with measurable results. Whether you need comprehensive or short-term support, a technical workforce with expertise in your equipment, organization and management of your parts storeroom, or sensor-based machine health monitoring and analytics, ATS will make your factory run better.

“ATS delivered beyond expectations. They have the ability to recruit specific skill sets and highly technical talent.”

RELIABILITY IS A CHALLENGE. WE CAN HELP.

ATS offers a variety of solutions to meet your unique needs, from comprehensive maintenance to more tailored programs that provide skilled technicians to supplement and support your maintenance and reliability goals.

Our proven value comes from the combination of our technically skilled workforce, established processes and data-driven technologies to help manufacturers meet their business objectives.

THE BEST TALENT

In today's competitive job market, we are a leading employer through our unique talent acquisition strategy that utilizes the latest tools, technologies and analytics to attract and hire the best talent for your production environment. For our highly skilled technicians on staff, we provide market leading salaries, robust benefits and additional incentives that are unparalleled in the industry.

A COMPETITIVE EDGE

ATS continually invests in the development of our technicians' expertise through a lab-based curriculum and the latest technologies in electronic and mechanical skill sets, plus advanced training in CNC, PLC, and robotics. Technicians also receive customized training to ensure they meet the needs of each customer's specific environment.

WORLD-CLASS SAFETY

At ATS, safety goes beyond our industry-leading OSHA incident rate and regulatory compliance. Our Beyond Zero safety culture prioritizes best-in-class safety procedures and programs with overall employee well-being.

SMART TECHNOLOGIES

Our technology-based approach to maintenance is driven by the ATS Reliability 360® Technology Center. It provides machine health monitoring, data analytics expertise and prescriptive actions to eliminate unplanned downtime, increase productivity and reduce cost.
