

PHARMACEUTICAL & MEDICAL DEVICES

# WE MAINTAIN ASSET HEALTH

**Some of the strictest protocols in manufacturing exist in the pharmaceutical and medical device space.** The creation of products that save lives and improve health is naturally tightly controlled, from discovery and initial development to their manufacturing, processing, packaging, and distribution. It is the only way to ensure that each drug, medication, biologic, or device produced is safe, pure, and effective for the patient who receives it – without exception.

Adherence to good manufacturing practices (GMP) is crucial to assure the products are produced and controlled according to current quality standards. It takes painstaking effort to prevent defects, contamination, mislabeling, and other dangers that can cause illness, injury, or death. Deviations in these industries go beyond a product recall – they can seriously alter someone’s life.

Specialized talent is needed to optimize the industry’s complex processes, machines, and facilities, yet qualified technical workers are in short supply. Ensuring machine reliability and availability is further complicated when aging equipment is involved, but time is of the essence when lives or health are at stake. Uptime is also an issue from a bottom-line perspective for plants striving to maximize product revenue for the duration of a patent.

ATS helps industries such as pharmaceutical and medical device manufacturing with technology-driven industrial maintenance and parts services while ensuring safety, high quality, and regulatory compliance. With decades of maintenance and reliability experience, ATS provides manufacturers increased uptime, improved asset reliability, and reduced manufacturing costs with measurable results. Whether you need comprehensive or short-term support, a technical workforce with expertise in your equipment, organization and management of your parts storeroom, or sensor-based machine health monitoring and analytics, ATS will make your factory run better.

**“We have an excellent partnership with ATS. They have a great commitment to continuous improvements, and they’re always aligned with our goals.”**

## RELIABILITY IS A CHALLENGE. WE CAN HELP.

ATS offers a variety of solutions to meet your unique needs, from comprehensive maintenance to more tailored programs that provide skilled technicians to supplement and support your maintenance and reliability goals.

Our proven value comes from the combination of our technically skilled workforce, established processes and data-driven technologies to help manufacturers meet their business objectives.

### THE BEST TALENT

In today's competitive job market, we are a leading employer through our unique talent acquisition strategy that utilizes the latest tools, technologies and analytics to attract and hire the best talent for your production environment. For our highly skilled technicians on staff, we provide market leading salaries, robust benefits and additional incentives that are unparalleled in the industry.

### A COMPETITIVE EDGE

ATS continually invests in the development of our technicians' expertise through a lab-based curriculum and the latest technologies in electronic and mechanical skill sets, plus advanced training in CNC, PLC, and robotics. Technicians also receive customized training to ensure they meet the needs of each customer's specific environment.

### WORLD-CLASS SAFETY

At ATS, safety goes beyond our industry-leading OSHA incident rate and regulatory compliance. Our Beyond Zero safety culture prioritizes best-in-class safety procedures and programs with overall employee well-being.

### SMART TECHNOLOGIES

Our technology-based approach to maintenance is driven by the ATS Reliability 360® Technology Center. It provides machine health monitoring, data analytics expertise and prescriptive actions to eliminate unplanned downtime, increase productivity and reduce cost.
