

POWER DISTRIBUTION

WE DRIVE OPERATIONAL PERFORMANCE

Across the globe, day and night, there is a high demand for cost effective electrical power. Increasingly automated factories and ever-expanding data centers serving growing populations and integrating alternative and distributed energy sources – all require safe, reliable, and efficient power distribution components. Unplanned downtime is not just inconvenient, but extremely costly and inherently risky.

Manufacturers and operators of power distribution systems strive for high performing, resilient solutions that enable sustainable, quality, and affordable load flow. Ensuring highly efficient and reliable equipment requires advanced maintenance practices. Predictive and proactive maintenance strategies are proven to minimize equipment failure and maximize uptime by enabling repairs and maintenance during carefully planned outages.

Though effective maintenance is vital, it is a non-core function of many businesses. Project-oriented electrical cabinet and component producers are concerned with order fulfillment. Recruiting, training, and retaining skilled maintenance personnel – from reliability leaders and advanced controls engineers to technicians experienced with aging legacy equipment – is outside of their core competency.

Moreover, widening skills gaps are putting performance and production goals at risk. Retiring baby boomers are taking specialized knowledge with them and replacements are harder to find; technology transformation requires new and unique skill sets; and plant modernization requires transitional talent to manage the diversity in equipment age and complexity.

ATS helps industries such as power distribution manufacturing with technology-driven industrial maintenance and parts services while ensuring safety, high quality, and regulatory compliance. With decades of maintenance and reliability experience, ATS provides manufacturers increased uptime, improved asset reliability, and reduced manufacturing costs with measurable results. Whether you need comprehensive or short-term support, a technical workforce with expertise in your equipment, organization and management of your parts storeroom, or sensor-based machine health monitoring and analytics, ATS is ready to work for you.

“Any of our plants I visit, I recommend ATS. They do exceptional work, exceed our expectations and manage maintenance better than we ever have.”

RELIABILITY IS A CHALLENGE. WE CAN HELP.

ATS offers a variety of solutions to meet your unique needs, from comprehensive maintenance to more tailored programs that provide skilled technicians to supplement and support your maintenance and reliability goals.

Our proven value comes from the combination of our technically skilled workforce, established processes and data-driven technologies to help manufacturers meet their business objectives.

THE BEST TALENT

In today's competitive job market, we are a leading employer through our unique talent acquisition strategy that utilizes the latest tools, technologies and analytics to attract and hire the best talent for your production environment. For our highly skilled technicians on staff, we provide market leading salaries, robust benefits and additional incentives that are unparalleled in the industry.

A COMPETITIVE EDGE

ATS continually invests in the development of our technicians' expertise through a lab-based curriculum and the latest technologies in electronic and mechanical skill sets, plus advanced training in CNC, PLC, and robotics. Technicians also receive customized training to ensure they meet the needs of each customer's specific environment.

WORLD-CLASS SAFETY

At ATS, safety goes beyond our industry-leading OSHA incident rate and regulatory compliance. Our Beyond Zero safety culture prioritizes best-in-class safety procedures and programs with overall employee well-being.

SMART TECHNOLOGIES

Our technology-based approach to maintenance is driven by the ATS Reliability 360® Technology Center. It provides machine health monitoring, data analytics expertise and prescriptive actions to eliminate unplanned downtime, increase productivity and reduce cost.
