

Reliability360®

MACHINE HEALTH MONITORING

R360® DATA

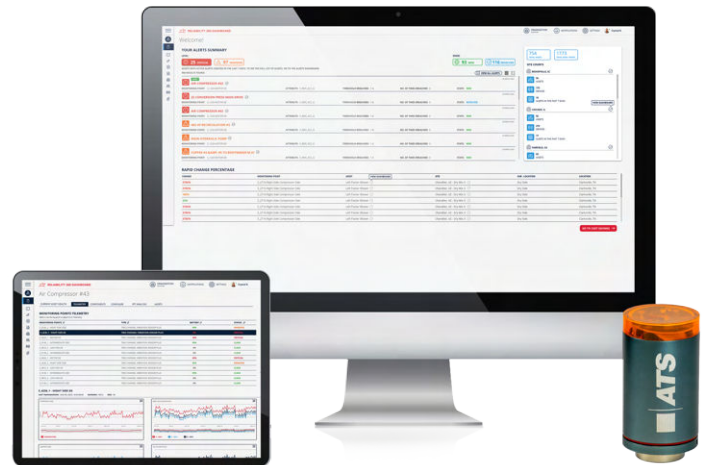

Cloud-based condition monitoring platform uses sensors to collect and centralize data.

R360® INSIGHTS

Integrated AI enables our expert analysts to prioritize and address issues before machines fail.

R360® RESULTS

Unparalleled support to prevent unplanned downtime and reduce labor and maintenance costs, ROI guaranteed.

END-TO-END IIoT SOLUTION

CONSULTATION & INSTALLATION
Evaluate and implement a tailored plan

24/7 MONITORING
Sensors collect machine data

REAL-TIME ALERTS
Analyzed by condition monitoring experts

PRESCRIPTIVE ACTIONS
On-site maintenance team addresses the issue

MEASURABLE RESULTS
Prevents unplanned downtime and reduces cost

ADDITIONAL SERVICES

Optional maintenance and parts support

TRUSTED & PROVEN EXPERTISE

With decades of maintenance and reliability experience, manufacturers trust ATS to increase uptime, improve asset performance, drive enterprise scalability and enable predictive maintenance processes.

“I can't say enough good things about ATS. I'm in daily communications with their reliability team and they answer all my questions and provide suggestions that improve my operational efficiency.” ”

- Reliability Manager, Leading CPG Manufacturer

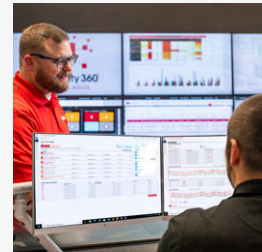

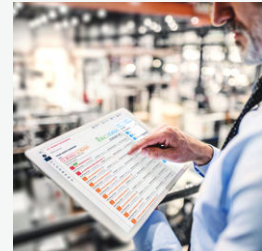

PREVENT UNPLANNED DOWNTIME

Continuously monitor the condition of your machines with expertise and support.

WHAT SETS **ATS** APART?

Unlike other machine health monitoring solutions, ours is driven by the ATS Reliability 360® Technology Center.

Our condition monitoring experts, including CAT III Vibration Analysts, provide manufacturers the data analytics and prescriptive actions to keep their factories running better and smarter.

R360® STRATEGY & SUPPORT

From initial consultation to ongoing monitoring and support services – we offer the breadth you need to keep your operations running.

- ✓ Reliability Consultation
- ✓ Professional Installation
- ✓ Enterprise Scalability
- ✓ Condition Monitoring Experts
- ✓ Centralized Technology Center
- ✓ Leveraged Knowledge Base
- ✓ Subject Matter Expert Network
- ✓ Optional Maintenance & Parts Services

R360® PLATFORM & ANALYTICS

An end-to-end condition monitoring platform bridging data acquisition through hardware, dashboards, applications, and APIs with actionable insights across monitoring points.

- ✓ Sensor and Gateway Hardware
- ✓ Cloud-based Software
- ✓ Secure Network
- ✓ Data Management
- ✓ Dashboards
- ✓ Real-time Alerts
- ✓ Full Suite of Analytic Tools
- ✓ CMMS and Data Warehouse Integration
- ✓ Measurable Results & ROI
